#### **Professional Ethics for Engineering Students**

The profession termed Engineering is the solicitation of the theorems of Mathematics and laws of Science, trends in Economy; understanding the theoretical aspects and applying the practical acquaintance of the knowledge to direct, design, polish & innovate the existing scenarios, mechanisms, practices and solutions for the benefit of mankind.

Engineering agreeably acknowledges special statistics, skills, and judgement. Engineers must perform under a standard of professional conduct that requires loyalty to the key principles of ethics with respect to the specific set of beliefs, approaches and behaviours exhibited by the individual or group. It is my privilege to share certain views on this topic. It is my humble request to the engineering students that they need to develop the zeal about why they have opted for the engineering profession. Further, I suggest them to accomplish the following measures to attain the determined values:

- Clear Vision & Goals
- Aim to meet the Expectations
- Focus on Priorities
- Use a Calendar
- Be Attentive & Competitive
- Stand Self-Restraint
- Boost up Confidence
- Look Smart & Work Smart
- Avoid WhatsApp & Facebook
